Chapter 17 2nd moon phase

3rd moon rising

Crucial Timing has come to Vircingetoris.

Not much else!

Within his position as General he can rule the
sudden attackforce with 'illegal' lasermobile.

They open the afternoon topfield, a recess-break
from attacks, displaying an array of stealthfighters
with laser. There is also a fieldarmy of
renovated'tanks'.

This as planned comes to a surprise as these
attacks, it's strange how they keep falling at the
walls, were continuing for 1½ months.

With highcalibre lasercannons released in forces
for ½ hour, they fill the skies&fields!

AC loses a city!

The southeasterlysector consisting
lowermiddleclasscitizens is destroyed!

40 million people nuked. Repnuke.

Because of the field comnitors surrounding the
city in a transparent magneticfield it is useless to
take a city.

AC uvasreserves, was calling communions on AC's
invulnerability

The media faded over who attacked first . In fact, they inspired debates!

AC was in an uproar . Now there are round-the-clock networkconnectedareas debates . This keeps the citizens in a passive-aggressive uneasy state-of-being .

Vircingetoris's (AKA's) military-media plan has worked

First phase of Influence!

A temporary, and thank goodness not a temporarily, fielddisturbance caused thibreak in the absoluteselfdefence,

AC immediately repairs the area with cashreserve.

Everything rests in Vircingetoris's and the rest of the general's

Generall dimbo: "Should we do a side-attack with the tanks or upfront." He's a lackey from a local family.

Vircingetoris says, "No! Planesfirst, less men."

The other general's agree.

They also all agree on the calibre of their weapons .

Viricgetoris controls the tanks based on an unanimous decision.

(They would considering he is alien)

It all rests in the lords of Vircingetoris and so does the future of AC.

The laserweapons destroyed a neighbouring lads with dives&swoops. The 'tanks' roll in thanks to the destruction of inferiortechnologyfields.

The tanks in.

Possession of a major city is for Vircingetoris!

Gifts are given to AC but the militarysystem is activated and there are volunteers ...

With fullsystem operational superiorlasermilitary in combination with the bestfields AC makes a campaign olang the coast of Africa ee.

Each city is taken! Aid the other lords no the fury of AC citizens.

This empowers this government and strengthens external relations.

Vircingetoris plan is working too well!

However Vircingetoris suggests a peaceful media campaign and a take-all military program like a good politician should.

Vircingetoris pushes absolute defens absolute democracy phase.

The citizens buy it!

Vircingetoris is a hero.

The citizens don't want and 'enlightened' dictatorship, they want absolute democracy.

Based on the newcities being held citizens climb to the streets in peaceful protests for absolute

democracy. They argue that no one can destroy the increasing empire of AC. The communions start again!

This makes everything easygoing for the generals.

The only problem, 3rd phase, means convincing General Stagon who holds a strong social democracy party that absolute democracy. However Vircingetoris is still fighting at their sides with superiortechnology and plenty-of-volunteers .

Vircingetoris during this whole time psychically communicating with his ItQ in the pasi of meditating must find the balance between supremacy and absolute democracy.

Shit.

At the last minute he stops his tankcontrol in favour of the cfozers and the new citizens.

Vircingetoris is a demi-god, as you know .

Now Vircingetoris must debate with The general Stago- as a stepoverpolitician for absolute democracy.

For Vircingetoris this is a whole new book!

AC has the media by the balls.
